ANCHOR CONTINENTAL STENCIL FILLER

These fillers work with the stencil adhesive to create a bond to withstand 100-150 lbs or greater PSI and still remain bonded to the stone or substrate. Stencil filler evens out the peaks and valleys of the substrate.

- #211 Filler** - Anchor's most aggressive filler, works well with hand cut stencil. **\$33.93 Gal. FILL211**
- #223 Filler** - Works with machine cut stencils and is the least aggressive. **\$33.93 Gal. FILL223**
- #333 Filler** - Water washable and is good for the environment. OSHA approved. **\$54.17 Gal. FILL333**

DON'T REPLACE YOUR OBSOLETE BLAST POT UPDATE IT AND SAVE!!

Convert your existing pot to the finest blasting system available in the industry.

THE WENZCO CONVERSION KIT

- Extremely dependable operation
- Easy to maintain. Valves can be fully maintained without removing them from the pot.
- Improves safety. OSHA required "deadman" control for manual blasting operations or push-button control for automatic curtains.
- Electrical control system will integrate with your automatic curtain to shut down blasting in the event of a power failure. Push button or pneumatic deadman controls also available for manual operation.

The automatic plunger valve replaces your Ruemelin, Pangborn, or other "mixing box". It is a favorite in the blasting industry because of its infinite control over abrasive flow, instant start and stop of the blast, and ease of maintenance.

WENZCO SUPPLIES ABRASIVE CLEANER

Manual abrasive cleaner for removing unwanted large particles and dust from your blast abrasive.

Abrasive is poured into the top of the cleaner where the top screen removes any large particles. The abrasive then flows through an adjustable gate regulating the volume of abrasive that flows down across the bottom zigzag screen. Unwanted dust falls through the bottom screen as the clean abrasive flows off the end of the screen into your receptacle.

SUPERIOR WEAR RESISTANCE NOZZLE

Style #2 Shape Carving Nozzle 3/32" Bore, 1-5/16" Long

Our **SWR** composite carbide nozzle represents a major break through in technology of wear resistance. The superior hardness and wear resistance of this nozzle is achieved by combining composite carbides, without soft binders, and the patented rapid omnidirectional compaction process. The ending result is a nozzle that you should find superior to any shape carving nozzle. **\$118.30 NOZZSWR2332**
