KAESER AIR COMPRESSORS

Kaeser has been around since 1918 and their portable rotary screw air compressors feature the power-saving proprietary Sigma Profile air end, and a heavy duty industrial engine. This very efficient combination allows these units to produce more air with less horsepower. They are slow running and well built to withstand years of tough operations. These quiet and compact units come with a 2 year warranty. The units need only minimal maintenance, and provide easy access to internal components.
