AIR OPERATED STENCIL HAMMER

Securely attach blast stencil to the stone fast and with very little effort. Press the air operated stencil hammer against the rubber, and move it across the stencil surface. The hammering action will ensure positive contact of the stencil to the stone, avoiding the possibility of stencil lifting during blasting.

BLAST MASK

Blast mask is a clay like substance which resists blasting when using shadow in a "single process". It is also ideal for masking shadow in a single process shape carving. It is applied after the stencil is removed, being easily pressed into letters or carving background with finger or putty knife. It is washed out of the letters with water. Blast mask comes in a plastic bag and is kept soft and pliable.
